This week in First Grade Math, we continued to work with regrouping numbers by tens and ones. We also practiced addition and subtraction facts using games and puzzles. We completed a formal reading fluency and comprehension test in ELA as we come to the end of the third quarter. In Science, we completed our unit about "Objects in the Sky" as we observed our shadows at various times during the school day. We observed how the movement of the earth changed the position of our shadows. In Bible, we continued to focus on the teachings of Jesus. We learned the importance of putting Jesus and others before ourselves. We "Tamed the Greed Monster" in our Bible curriculum books. As always, we enjoyed our "computer lab" with Dr. Smith. This week he taught us how to use the up, down, left, right keys to change positions. We played with maze games on our computers to practice this skill.

Everyone seemed to enjoy our field trip to "Mary Poppins". We are now looking forward to next week’s trip to see "Frozen Jr.", on Thursday, March 19. We will follow the same procedure as we did for "Mary Poppins", students are to wear one of their regular uniform choices, NO P.E. CLOTHES, along with a comfortable pair of shoes. Students will be allowed to eat snack before we leave (departure is 9am) and will have lunch when we return around 12 noon.

Please make sure your child is turning in their weekly homework packet on Fridays. I am receiving too many packets late. As we enter the fourth and final quarter of First Grade, let’s help instill good work habits in preparation for the coming school years. Thank you for your support in this matter.

If you have not donated your consumable supplies yet, please do so as soon as possible. We are diligently washing hands and wiping all classroom surfaces multiple times daily. So all classroom cleaning supplies are needed.

Have a Blessed Weekend!

Mrs. Thomas
