

First Grade Newsletter

April 16, 2021

This week, in First Grade, we got back to academics after our week of Spring Break! In Math, we learned about congruent shapes, we learned how to measure line segments with a ruler and continued to practice reading fluency and comprehension through our Journeys story "Amazing Animals". In Science, we enjoyed learning about objects in the sky. In Bible, we discussed the importance of sharing the word of God to others through our own words and actions. The story in our Bible curriculum "Jesus Appears to Mary" exemplified this lesson to us. We also enjoyed an in-house field trip "Zoo 2 You".

This week's homework packet will consist of a long term animal project that will be due on Thursday, May 6th. Have your child work on this each day as they would their usual homework packet. They are very excited to begin learning and sharing about an animal of their choice!

A reminder, our field trip to the Sacramento Zoo is Friday, May 7th. As it gets closer, more details will become available! Thank you again to everyone for your quick responses. It will be a great school experience and memory for the kids.

Looking ahead, Friday, April 30th is a minimum day. All students will be dismissed at 12 noon. Extended Care will be available.

Mrs. Thomas
