

Clemons' Class News!

May 6, 2002

Hello, Parents!

With less than 20 days left in the school year, third grade is still working hard and learning new things! We also are still working on the challenge of division with remainders and started graphing this week. They are learning to use negative numbers on a number line and in equations. I'm really proud of how far they have come since January!

We completed a unit about how America works and the students will be writing a short speech to get elected as "mayor". That will be due on Wednesday. In science, we learned all about the water cycle as well as how weather works. They really enjoyed the projects and I was very impressed with their work!

Prodigy is still a big part of preparing them for 4th grade. I plan to keep the class active throughout the summer so they can hone their skills in math and English.

Here is what's in store for next week!

Clemons' Class News!

Moms, come and enjoy a muffin with your kids on Muffins with Moms Day! We would like to honor all moms for the love and support you give to your children to celebrate Mother's Day! Friday, May 13, 2022 , 7:45-8:30am Pergola Area, near carpool

I wish all the moms a very restful and blessed Mother's Day. May your children rise up and call you blessed!

Have a wonderful weekend!

Blessings and Peace,

Mrs. Clemons
